Current Month Distribution

XTO Energy has advised the Trustee that out of period adjustments in the Texas Working Interest net profits interests had a significant impact on the oil sales volumes and average prices reported in the January 2022 distribution. XTO Energy has advised the Trustee that these adjustments were primarily a timing issue due to receipt of oil sales of approximately 70,000 Bbls from the operator of the North Cowden Unit that had been reversed by the oil purchaser in the October 2021 distribution. XTO Energy has advised the Trustee that the average price received for these oil sales was approximately \$52.00 per Bbl.

Excess Costs

XTO Energy has advised the Trustee that \$3,749,000 of excess costs were recovered on properties underlying the Texas Working Interest net profits interests primarily due to receipt of oil sales from the operator of the North Cowden Unit that had been reversed by the oil purchaser in the October 2021 distribution. However, after the partial recovery, there were no remaining proceeds from the properties underlying the Texas Working Interest net profits interests to be included in this month's distribution.
